Is there any way to measure precisely bandwidth between two computers in a LAN?

Both PCs negotiate at 2.5Gbps mode as confirmed in the network adapter status screen. Both PCs have IPv6 turned off. The CPU load on the NUC during a speedtest never goes

Doing a speed test from PC to PC, etc may not be accurate because your computing power might need to be very powerful in order to push that kind of data. CAT6A would

How can I test the speed of a LAN? I hope there is something baked into Windows to do this, because I am unable to install any third-party products.

Every internet speed test I try (sponsored and independent) show that each device on my home network has ~50 Mb/s download speed. My router also lets me perform a speed test

On internet speed test says 512.23Mbps (download) and 926.79Mbps (upload). But when trying to download a game or any file larger than 1GB it doesn't go up more than 5Mbps.

La luz amarilla del Boot es que no encuentra la unidad de arranque, pero al menos debería de dar señal de video. Resetea los valores del BIOS haciendo un Clear\_CMOS.

Para confirmar si las piezas clave (CPU, DRAM, Tarjeta gráfica, HDD / SSD) tienen un inicio anómalo durante el arranque, debe verificar si alguna luz Q-LED de la placa base está siempre encendida.

To troubleshoot a network problem I would like to inquire the real network "speed" for a given network adapter, which can be seen when opening the "status" of a network connection

## La alimentación de la estación base es amarilla y no tiene salida

Ideally always test with a wired connection to limit factors (wifi interference). Here is a few steps i would do in order to find the problem and test network speed: First, make sure that the links between your

Yo tengo un enchufe justo debajo de cada estación base y utilizo la regleta del ordenador para poner el del Link Box. Asegurate de tener conexiones disponibles en tu ordenador.

Hay un pequeño botón en la parte posterior de su estación base. Antes de presionarlo, verifique la estación base con la luz verde e identifique qué letra tiene.
