CalibratedDisplayProfile-1 is from the Windows calibration procedure. In the All Profiles list the Class is "Display" not a Printer/Scanner or whatever. Some manufacturers may

I have spent some time to learn about HDR, calibration of TV:s and particularly how HDR works in RDR2 - both from Digital Foundry's videos and by experimenting for myself. What to

When viewing HDR content on Windows, whether gaming, creating content or watching a movie, we all want to have a great experience. But, in some cases (particularly on

How to Turn On or Off HDR and WCG Color for a Display in Windows 10 With Windows HD Color in Windows 10, you get the most of out your high dynamic range (HDR) TV or PC

My system is HDR capable, and I have turned that on in settings. I have produced a custom color profile my calibration using an X-Rite I1Display device and their I1Profiler software.

Created by VESA, the Video Electronics Standards Association, this new test tool has a simple keyboard interface that enables professional and lab-level users of off-the-shelf

A few months ago I had to calibrate a very old monitor using a Spyder and calibration software and since then that monitor has died. I removed the calibration software but

You can calibrate your built-in video display for HDR content to get the video quality and look you want when you're watching streaming HDR video. By calibrating your display, you can

I was playing and swore there was an HDR setting, but when I launched it today I couldnt find it. Am I just tweaking? or is the setting missing? if its missing then how do I get it back?

Do you have profiles for your (unnamed) Benq monitor installed in the Color Management control panel? Some may be available for download, as part of a "display drivers"
