The Kairouan Solar Park, located in central Tunisia, is already one of the country's flagship solar photovoltaic (PV) installations, with its initial 100 MW phase becoming operational in

Each of Voltalia's three solar PV projects will be similar in size to the 120MW Kairouan solar project, which is currently the largest operational PV plant in Tunisia.

On December 16 local time, the 100 MW Kairouan Solar PV Project, the largest single-site photovoltaic project in Tunisia, achieved full-capacity grid connection and officially entered

Ember reports that Tunisia imported 655 MW of Chinese PV panels between July 2024 and June 2025, ranking sixth among African solar module importers, behind Morocco, Egypt,

French developer Voltalia will construct a 100 MW solar farm in Gabès province. A consortium of Norway's Scatec and Japan's Aeolus, a unit of Toyota Tsusho, will develop a 100 MW

The Kairouan project forms part of Tunisia's broader plan to deploy five large-scale solar plants totaling 500 MW across regions like Tataouine, Gafsa, Tozeur, and Sidi Bouzid.

UAE's AMEA Power and Norway's Scatec (OSE: SCATC) are the main developers and plan to complete the projects by the end of 2025. The third set of projects will add 500 MW of

The upcoming solar plants in Tunisia will see the nation construct a 200 MW plant in Tataouine, 100 MW plant in Gafsa, and two 50 MW plants in Tozeur and Sidi Bouzid.

On average, Tunisia has solar resources of over 3,000 hours/year, with some regions enjoying more sunshine than others. Most regions in the south of the country have more than 3,200 hours of

## Which pv site is more popular in tunisia

France's Qair International will build a 100 MW solar plant in the Kasr region, Gafsa province, and a 200 MW project in the Al-Khabna region, Sidi Bouzid, while the French
