El armario de almacenamiento de energía LiFePO4 100kw 215kwh refrigerado por aire ofrece almacenamiento de baterías de litio de gran capacidad, seguro y eficiente con gestión térmica

Este gabinete integrado combina módulos de potencia, baterías, refrigeración, protección contra incendios y monitoreo en tiempo real en una sola unidad robusta. Ideal para sistemas híbridos

En casa> productos> Sistema de almacenamiento de energía de microrredes > Cabinet de almacenamiento de energía LFP de 100KW con sistema de batería de 215KWH

Con control inteligente, alta eficiencia de conversión y baja pérdida en espera, garantiza un uso óptimo de la energía al tiempo que reduce los costos operativos.

Operating within a temperature range of -20 °C to 40 °C, it ensures reliable functionality in various environments. Additionally, autonomous functions are available upon request, promising a

This fully integrated 100kW/215kWh system combines high-density battery storage with intelligent power management in a single, factory-assembled unit - delivering unmatched performance and reliability

You cut fuel burn and keep power steady when logistics are hard. Run PV as primary, diesel as backup, and let the system auto-switch between on & off grid and on grid modes; add 100KW battery

Equipped with rack-mounted modular PCS, which supports multi-machine parallel connection and has good scalability; the number of PCS modules and total battery power can be selected according to

Workshop power cabinet 100kW

This Energy Storage Hybrid PCS Cabinet: A versatile solution for industrial and commercial energy storage. Seamlessly integrates grid-connected and off-grid modes, with bidirectional ACDC and

High-quality energy storage cabinets will feature premium-grade power terminals designed for secure and efficient connections. These are typically clearly marked as "-" (Negative) and "+" (Positive).
